Laminator Automatic Komfi Delta 52-A (B2) + Stacker

Year: 2014

Description:

- It is intended for lamination of small and long circulations of a format up to B2.
- The ideal solution for laminating digital and offset prints.
- Professional quality lamination for a large number of small orders.

Features and Benefits:

- Automatic control of the entire lamination process,
- Touch screen display provides comfortable control of the machine
- Electronic control of sheet transition amount
- Laminating cylinder heated by an infrared emitter
- Processor-controlled feeder head and additional separation airflow ensure stable sheet loading;
- Precise and stable overlap at any laminating speed

Specifications:

- Max. sheet format, cm: 56 × 80
- Min. sheet format, cm: 20 × 20

- Max. slipway height, cm: 48
- Max. lamination speed, m/min: 25
- Paper density, g/sq.m: 115-600
- Thickness of the laminating film, microns: 24-50
- Type of laminating film: nylon, polypropylene, polyester
- Laminating roller heating time, min. (25÷100 °C): approx. 3.5
- Max. recommended laminating temperature: 135 °C
- Sheet overlap accuracy: ± 2 mm (at constant laminating speed)
