Komfi Delta 52 automatic laminating machine

Designed for laminating short and long runs up to B2.

Ideal for laminating digital and offset prints.

Professional lamination quality for large quantities of small orders.

Specifications:

Max. sheet size, cm: 52 × 76

Min. sheet size, cm: 20 × 20

Max. stack height, cm: 63.5

Max. lamination speed, m/min: 35

Max. unit load: suitable for three-shift operation

Paper weight, g/m²: 115-600

Laminating film thickness, µm: 24-50

Laminating film type: nylon, polypropylene, polyester

Laminating roller heating time, min. (25÷100°C): approx. 3.5

Max. recommended lamination temperature: 135°C

Sheet overlap accuracy: ±2 mm (at constant lamination speed)

Features and benefits:

Electronic control of sheet overlap,

Touchscreen display provides convenient machine operation,

Automatic control of the entire lamination process,

Infrared-heated lamination cylinder,

Processor-controlled feeder head and additional separation airflow ensure stable sheet loading;

Accurate and consistent sheet overlap at any lamination speed
